

WebStudy COURSESTREAM™

WEBSTUDY 'Learning' CMS with CourseStream™, goes way beyond text-based CMS delivery, seamlessly integrating high quality video content into the online learning experience.

WEBSTUDY 'Learning' CMS with CourseStream enables you to:

- Make quality video content available anytime, anywhere to both broadband and dial-up students through Windows Media Player (PC) or Quicktime (Mac)
- Integrate multi-media in your coursework online or in the classroom

Bookmark streaming video to economize student's time and offer focused "chunks" of relevant video in a lesson.

- Include telecourse or third-party video productions
- Include any digitized institution-specific video content

Benefits

- Easy to use system to create targeted video clips
- Seamlessly add audio-visual content into online courses
- Students can view the complete video or specific segments
- Each user can choose his/her media player and connection speed
- A dynamic note feature lets students take individual or group notes about the video experience
- Enables administrators and faculty to easily store, manage and distribute streaming video semester after semester
- Rights management tools ensure adherence with 3rd party video licenses

- Bookmarking and captioning (ADA)
- CMS integrated or stand-alone

Background

The WEBSTUDY product suite includes online learning solutions that go beyond traditional course management systems. WEBSTUDY is the only CMS provider to offer software as a service (SaaS) freeing schools from hardware/ software hidden costs, unnecessary downtime and protracted implementations.

Conceived by a professor and a student, WebStudy's philosophy is to enable faculty to help students succeed and aid administration and faculty in launching quality learning programs. Our tools will demonstrate to accrediting bodies that your institution is committed to producing well-prepared students
